

Advanced Programme in Food City Design, 2021

Mid Sweden University is pleased to announce a new, advanced international programme that focuses on food city design.

The Food City Design programme will be delivered through a special collaboration between the University of Parma, Mid Sweden University, University of Alicante, University of Bergen and the UNESCO Creative Cities Network.

The programme is aimed at developing professional expertise in food culture

with an emphasis on issues such as local agricultural systems, food tourism, and food quality in terms of production, processing, distribution, and other stages of the food chain that are critical elements of sustainable food networks. More information can be found on
