

Quick start Zoom for students

Zoom is a net-based conference room solution for meetings and online education at Mid Sweden University. You can easily download Zoom for PC, MAC or Linux.

Download via client

The first time you click on a Zoom link or log into <https://miun-se.zoom.us>, a downloadable programme for the Zoom client will start automatically. Follow the instructions to download it. If you would like to prepare your first Zoom meeting, you may also download the client in advance by using the link above.

Participate in a meeting by using a meeting ID or link

You will receive the link to your lecture in Moodle or in your schedule (in the Student portal Time Edit). Your teacher can tell you where to find your course link.

- Click on the link you received in the meeting invitation. Follow the instructions.
- You can also use the meeting ID to join a meeting. Open your Zoom client and click the blue *Join a meeting* button. Type your meeting ID and click *Join*.

Please note

- Use your headset and camera in meetings.
- Turn off the sound when you are not talking.
- The chat history starts when you enter the chat room.
