

Checklist for new users – Office365 Teams

Start by reading the guides *Rules for Office365* and *Routine description for digital workspaces*

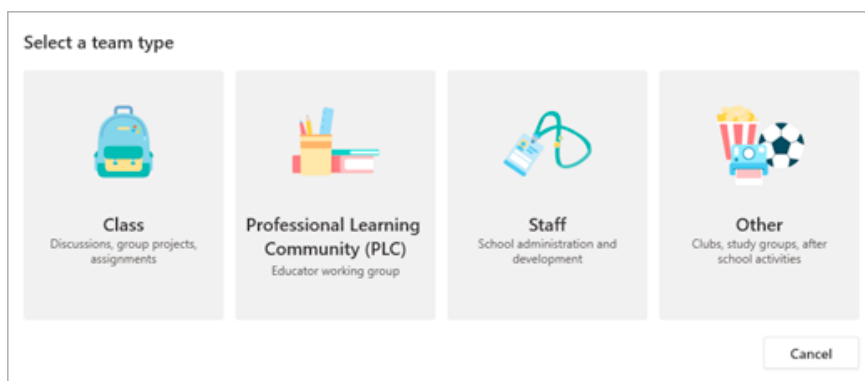

You will find the documents here:

<https://www.miun.se/en/staff/university/Developmentworks/projects/office-365/>

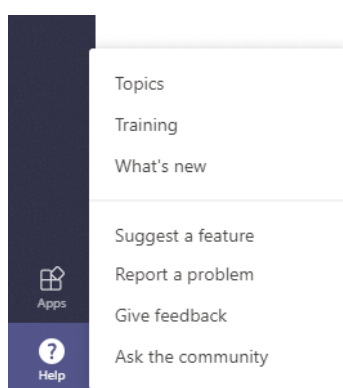

When you start a team

- Agree with the group to use the team as a workspace and agree on how you want to collaborate.

These are the team types:

At the moment, Mid Sweden University recommends you to use the team type Other. It only contains posts and files, but the team can add other tools when needed.

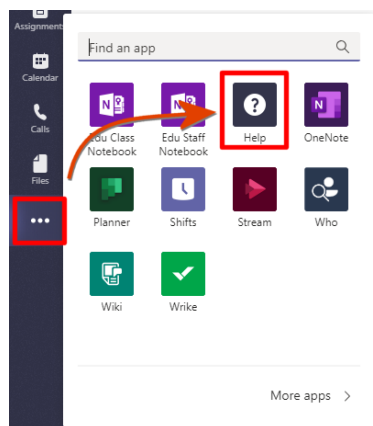

Under *Help* och *Topics*, you will find further information about the different team types, but you can also find the information here:

[*Further information about the team types for collaboration in Microsoft Teams*](#)

You will find further information about how to set up and use the different team types in Teams:

- Click on the three dots on the left
- Select Help
- Read the parts that are of interest for your team

To consider as the owner of a team

- When the team is created, you will have the opportunity to select an image that mirrors the content. Please note that images may have copyright protection
- Decide if the team is private or public (if it is public all Mid Sweden University staff members and students can see and participate in the team).
- You can add apps to your team, but note if they are supported by Mid Sweden University or not.
- Please make sure to build a clear structure for the files that are to be uploaded to the team.
- Should a member of the team terminate their employment at Miun, the person will disappear from the team but all posts, comments etc. will remain.
- If you do not need your team any longer, please make sure to terminate it (download the documents/files you wish to keep), see the archival requirements in "Rules for O365".

To consider as a user

- The recommended browsers are Edge and Chrome
- E-mail addresses can be used to log in to Office365.
- Under "Tools" in the header of miun.se, you can select the O365 services you wish to use out of those supported by Mid Sweden University.
- The O365 apps can be downloaded to your phone and other units.

- Go through and update your personal settings.
 - Under *Notifications*, you can decide how you wish to be notified, i.e. activate or turn off the activities signal.
 - Look at the settings for your time zone in the calendar settings.
- As a user, you can be invited to other organizations' teams and you can easily access them in the upper right corner in "Teams" under Mid Sweden University.
- O365 does not support the use of templates. Therefore, the Miun templates can be used by creating empty documents using the Miun templates in your computer and then saving them on OneDrive. Copy the template to the team where you wish to use it.

Skype and Teams

- Incoming calls and chats will end up in the same client as the one that initiated the call or chat.
- Users can initiate calls and chats from both clients.
- The Outlook calendar can indicate presence both in Skype and in Teams.
- During a transition period, we are using both Teams and Skype. Please note that if you change your availability in Skype, it will not be transferred to Teams, as the systems are completely separated.
- When you are activated as a user, Teams will be integrated in Outlook, which means that you can book meetings both in Skype and in Teams.

- Skype will be phased out at Mid Sweden University no later than 31 December 2020.
