

X-Ray Photoelectron Spectroscopy (XPS) at Umeå University

Open Seminar

XPS facility at Umeå University: Scientific applications and Future perspectives

Dr. Andrey Shchukarev, Associate Professor
Department of Chemistry
Umeå University

Chemistry of the solid-solution interface defines, in many aspects, our way of life and the world around us. My research field is application of ultra-high vacuum techniques, mainly X-ray Photoelectron Spectroscopy, to study processes occurring at this interface: adsorption, precipitation, dissolution, corrosion, etc., and their influence on biogeochemical cycling of the elements.

When 28 April 10.00 – 11.00
Where Campus Sundsvall MI02

Welcome!
