## Leading in an Uncertain World WHAT'S BELONGING GOT TO DO WITH IT?

Professor Kathryn Riley  
DancePoet TioMolina

'Belonging' is that sense of being somewhere where you can be confident that you will fit in & be safe in your identity.

Bringing together Education with Art to harness the skills & talents of schools, & build new partnerships with communities around common purpose.

**A school is just a building.....**

Whether the spaces in the school are transformed into places of belonging & learning is down to the people in and around it, particularly the leaders.

## Creating Schools as Places of Belonging:

### The Art of Possibilities

Schools are one of the few shared social institutions which can create a sense of belonging or exclusion.

In a global context of change & uncertainty, this workshop builds on pioneering work on place & belonging to ask:

**How can we create schools that are places of belonging & possibility?**

School leaders will be encouraged to explore:

- In Sweden today, why does belonging matter?
- How can we as leaders make a difference to belonging?
- What does a school look like where belonging works?

Kathryn Riley

Professor of Urban  
Education UCL,  
Institute of Education
